

Rentokil Pest Control

Rentokil provide expert and professional pest control services throughout the UK. We offer fast reliable and effective solutions to pest infestations of any kind.

We lead the way in developing innovative, environmentally sensitive solutions for the detection, prevention and elimination of troublesome pests, including:

- Flying insects - flies, wasps, moths hornets
- Crawling insects - ants, cockroaches, bed bugs, fleas
- Rats and Mice
- Pigeons and Gulls

We offer a wide range of innovations, including:

Lumnia Range

Rentokil's innovative Lumnia fly control units use LED technology to effectively eliminate flies and protect your business.

RADAR

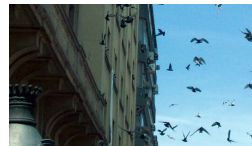

As a bait-free and humane mouse trap, RADAR is the perfect option for areas where the use of rodenticide is not an option.

AutoGate

AutoGate is an intelligent rodent bait station which controls access to rodenticide for external rat baiting.

Bird Control

Rentokil provides discreet and effective bird control solutions to keep your business pest bird free.
